

Pipette Tips

Tips for Automated and Manual Pipetting

MolGen offers pipette tips for both manual and automated liquid handling. The robotic pipette tips are compatible with the PurePrep TTR & PurePrep TTS systems, but also with a wide range of Tecan and Hamilton systems. Their high quality and precision make them a perfect fit for manual or robotic, single and multichannel pipettes.

Read more about our available pipette tips on the following table. Feel free to contact sales@molgen.com to order tips or to inquire about compatibility with other systems.
